## DAY 01

# INTRODUCTION AND SETUP

### Aim

Get acquainted with Python and set up the development environment.

### Resources

- Python Official Documentation:  
<https://www.python.org/doc/>
- Codecademy Python Course:  
<https://www.codecademy.com/learn/learn-python-3>

### Example Questions

**Q 1:** Write a Python program to print "Hello, World!"

**Q 2:** Calculate the sum of two numbers entered by the user.

**Q 3:** Convert temperature from Celsius to Fahrenheit.

## Practice Questions

1. Write a Python program to calculate the area of a rectangle given its length and width.
2. Create a program that takes a user's name and age as input and prints a greeting message.
3. Write a program to check if a number is even or odd.
4. Given a list of numbers, find the maximum and minimum values.
5. Create a Python function to check if a given string is a palindrome.
6. Calculate the compound interest for a given principal amount, interest rate, and time period.
7. Write a program that converts a given number of days into years, weeks, and days.
8. Given a list of integers, find the sum of all positive numbers.
9. Create a program that takes a sentence as input and counts the number of words in it.
10. Implement a program that swaps the values of two variables.
